news release

Nov. 12, 2021

45 New Cases Reported Since Wednesday; Pediatric Clinics Available

Humboldt County Public Health reported today 45 new cases of COVID-19 since Wednesday, bringing to 9,653 the total number of residents who have tested positive for the virus. There were no new hospitalizations or deaths.

Public Health will hold several pediatric and family vaccination clinics in the coming weeks to provide children ages 5 to 11 the recently authorized Pfizer pediatric vaccine. Appointments will be required and can be made on the state's [MyTurn.ca.gov](https://myturn.ca.gov) vaccination portal.

Pediatric clinics will offer vaccine to children ages 5 to 11 only. Family clinics give priority to children ages 5 to 11, but parents and guardians of children who are getting vaccinated can receive any dose of the COVID-19 vaccine.

Due to a sharp increase in demand, walk-ins are not allowed at family and pediatric clinics for children ages 5 to 11 at this time. Boosters are not currently available to the general public at family clinics.

Walk-ins are allowed at most Public Health and many pharmacy vaccination sites, although people without appointments may see significant delays. Appointments are strongly recommended. The best way to ensure you receive a shot is to make an appointment at [MyTurn.ca.gov](https://myturn.ca.gov).

Vaccines, including boosters, are widely available at local pharmacies. To check the availability of a specific vaccine, visit the vaccines.gov page, or text a ZIP code to 438829 to locate a nearby pharmacy offering vaccines.

Data Update

Since the last weekly data update on Nov. 5, the county has recorded 201 new cases of COVID-19. One death of an unvaccinated person was also reported during that period. The average age of deaths due to COVID-19 is 79 among the fully

vaccinated residents and 66 in the unvaccinated. All of the five hospitalizations reported over the last week were unvaccinated residents. Age ranges of reported hospitalizations are as follows:

- 1 person in their 30s
- 1 person in their 40s
- 1 person in their 60s
- 2 people in their 70s

The seven-day average case rate in Humboldt County is currently 14, meaning that for every 100,000 residents, about 14 tested positive daily over the last seven days. Case rates vary considerably by vaccination status, as illustrated by the graph below, which depicts average weekly case rates since Dec. 2020 in unvaccinated and fully vaccinated residents.

The current seven-day average case rate for fully vaccinated individuals is 13 per 100,000 residents while the case rate for unvaccinated individuals is 16 per 100,000 residents. View a more detailed depiction of the [case rate graph](#).

See the schedule below for specific vaccination and testing clinic dates, times, locations and available services:
