news release

Dec. 14, 2021

2 New Hospitalizations, 32 New Cases Reported

Humboldt County Public Health reported today 32 new cases of COVID-19, bringing to 10,466 the total number of residents who have tested positive for the virus. Two new hospitalizations were also reported, a resident in their 20s and another in their 60s.

The California Department of Public Health announced yesterday a statewide mask mandate for all indoor public settings regardless of vaccination status. The mandate will go into effect Wednesday, Dec. 15, and end Jan. 15, 2022. Health officials cited the fast-spreading Omicron variant and holiday travel among the reasons for reimposing the mandate. Humboldt County has been under a similar mandatory indoor mask order since Aug. 6.

The state also updated its testing requirements that begin tomorrow for mega events, such as sporting events, concerts and conventions with 1,000 or more indoor attendees or 10,000 or more attendees in outdoor settings. Those who cannot provide proof of full vaccination status are required to provide a negative antigen test within one day or negative PCR test within two days prior to entry into the event.

On Saturday, Dec. 18, Public Health will hold a mobile vaccine clinic in Arcata at the Community United of North Arcata's (CUNA) Winter Arts and Artisan Market at the Red Roof Inn, 4975 Valley West Blvd., from 11 a.m. to 4 p.m. The event will feature local food vendors and performers. The Area 1 Agency on Aging announced it is offering incentives to individuals aged 60 and older who receive a vaccine at the clinic, or the caregiver of the person aged 60 or older who receives a shot.

Last week, the state expanded Pfizer booster eligibility for 16- and 17-year-olds if it has been at least six months since their initial Pfizer vaccination series.

Public Health officials said expanding boosters to that age group will increase protection against the Delta and new Omicron variants. Omicron has been identified

in California and 29 other U.S. states so far and Public Health is continuing to conduct genetic testing locally while awaiting the arrival of the fast-spreading variant.

Stricter travel requirements by the CDC also went into effect last week for international passengers flying into the U.S. All international passengers, regardless of vaccination status, must show a negative test prior to boarding taken one day before their departure.

Residents who have travelled internationally in the past two weeks and test positive with at-home tests are asked to call the Joint Information Center at 1-707-441-5000 to report their results to Public Health. Those who have not travelled outside the U.S. and test positive with an at-home test for COVID-19 should notify their primary care provider or Public Health, if there is no provider, and isolate to limit the spread of disease.

Travelers leaving Humboldt County who are flying internationally should contact the airline prior to travel and stay current on their destination's specific COVID-19 vaccination and testing requirements. Information can be found for most countries at the U.S. Department of State's [travel advisory](#) website.

In addition to encouraging eligible people aged 16 and older to get boosters, health officials also stress that those who are partially vaccinated should complete their vaccination series. A person who is fully vaccinated is half as likely to pass on the infection as someone who is unvaccinated. According to [data](#) from the CDC, an unvaccinated person is nearly six times more likely to get COVID-19 and 14 times more likely to die from COVID-19 than a vaccinated person.

Public Health is offering family vaccination clinics throughout December to give priority to children aged 5 to 11 and provide family members a convenient way to get their vaccines.

Vaccines, including boosters, are available at local pharmacies. To check the availability of a specific vaccine, visit the [vaccines.gov](#) page, or text a ZIP code to 438829 to locate a nearby pharmacy offering vaccines.

Humboldt County's vaccination and testing services are available free of charge. Although walk-ins are allowed at most regular Public Health clinics and many pharmacy vaccination sites, a sharp increase in demand for boosters has caused delays at some locations. As a result, appointments are required for pediatric clinics and for clinics at Public Health's main office. Appointments are strongly recommended for all other clinics and are the best way to ensure a shot is available during your visit. Appointments can be made at [MyTurn.ca.gov](#).

See the schedule below for specific Public Health vaccination and testing clinic dates, times, locations and available services:

Eureka Booster Clinic— Wednesday, Dec. 15, noon to 5 p.m

Wharfinger Building (1 Marina Way)

Pfizer/Johnson & Johnson/Moderna.
