news release

Feb. 10, 2022

1 New Hospitalization, 121 New Cases

Humboldt County Public Health reported today one new hospitalization of a resident in their 60s. An additional 121 new cases were also reported, bringing the total number of confirmed positive cases of the virus in the county to 18,435. No fatalities were reported.

California's indoor mask mandate is set to expire next week for vaccinated individuals, and Humboldt County health officials said the county will align with the state and let its local indoor mask order expire at the same time.

This means individuals who are vaccinated against COVID-19 will not be required to wear face coverings indoors in most public settings after the masking mandate ends Feb. 15. Those who are unvaccinated must still wear masks indoors in public.

Fully vaccinated individuals are recommended to continue indoor masking in locations where the risk may be high. In areas with a high rate of community transmission, such as in counties like Humboldt, the Centers for Disease Control and Prevention (CDC) recommends everyone wear a mask in public indoor settings.

In specific higher risk settings, [California Department of Public Health \(CDPH\) face covering guidance](#) continues to require masks be worn by all individuals, regardless of vaccination status. These include indoor locations in K-12 schools, childcare and health care settings, public transportation and transit hubs, correctional facilities, homeless shelters and long-term, adult and senior care settings. Workplaces will continue to follow the [COVID-19 prevention standards](#) set by CalOSHA.

Residents, particularly those who are unvaccinated, are urged to continue to take protective measures against COVID-19 by washing hands frequently, [wearing a well-fitted mask](#) approved by the CDC, distancing six feet from others when possible and avoiding crowds and poorly ventilated spaces.

CDPH recommends individuals stay home and away from others and get tested if they become sick or experience COVID-19 symptoms. These symptoms may include fever, cough, shortness of breath, fatigue or muscle aches and often mimic common cold or flu illnesses.

Representatives from the True North Organizing Network will be at Public Health vaccination clinics scheduled today until 7 p.m. and on Thursday, Feb. 17, at the Church of the Joyful Healer in McKinleyville. Spanish-language translation will be provided on-site. Thanks to collaborations like these, more than 66% of Humboldt County's Latino population is fully vaccinated, compared to the state's metric of approximately 57%.

The Humboldt County Joint Information Center will be closed Friday, Feb. 11 as the county celebrates President Lincoln's Birthday. It will reopen Monday, Feb. 14.

Tomorrow's case rates, hospitalizations and deaths data and graphs that are regularly reported weekly on Fridays will be reported instead on Monday, Feb. 14, due to the holiday.

Vaccines remain readily available and, as always, Humboldt County's vaccination and testing services are available free of charge. While walk-ins are allowed at all Public Health clinics and some pharmacy vaccination sites, appointments are recommended for all vaccinations and are the best way to ensure a shot is available during your visit. Appointments can be made at [MyTurn.ca.gov](https://myturn.ca.gov).

Vaccines, including boosters, are available at local pharmacies. To check the availability of a specific vaccine, visit the vaccines.gov page, or text your ZIP code to 438829 to locate a nearby pharmacy offering vaccines.

See the schedule below for specific Public Health vaccination and testing clinic dates, times, locations and available services. Questions about clinic services can be directed to the Joint Information Center at 1-707-441-5000.
