Subject: Nordic AquaFarm: No.

“Nordic AquaFarms’ proposed aquaculture facility in Samoa would be the largest project in Humboldt County in decades. At full build-out, It would use 21% of the county’s energy supplies – as much as the cities of Eureka and Fortuna combined. And yet the draft EIR concludes there would be no significant impacts from greenhouse gas emissions, truck traffic, bay intakes that will draw 10,000,000 gallons and an ocean discharge of 12,000,000 gallons of treated wastewater a day.” (350 Humbolt)

No significant impacts? Just check those last two numbers.
I see a huge impact, one that is unacceptable for our planet as well as for Samoa.

Sincerely,
Ms. Shawn Troxell
