news release

March 9, 2022

50 New Cases Since Monday

Humboldt County Public Health reported today 50 new positive cases of COVID-19 since Monday, bringing the total number of confirmed cases in the county to 19,813. No new deaths or hospitalizations were reported.

As of Tuesday, Public Health and other local vaccinators have administered a total of 176,085 doses of COVID-19 vaccine to Humboldt County residents. The number of total doses administered decreased by two since the last reporting period because some individuals vaccinated locally were removed from the count and assigned to another jurisdiction by the state.

Local vaccination data has been updated on the [Humboldt County Data Dashboard](#). Highlights include:

- Since the last weekly report on March 2, 36 additional residents completed their vaccine series.
- Approximately 65% of the county's total population was fully vaccinated as of Tuesday.
- A total of 88,077 eligible residents, or just over 68% of the county's population aged 5 and older, were fully vaccinated. Approximately 6% of the county's total population has been partially vaccinated as of this reporting period.

State masking guidance for schools is changing March 12. Parents with questions about how their child's school will implement the new guidance should contact the school or school district.

Starting next week, the Joint Information Center (JIC) will begin issuing Case Count news releases and Data Dashboard updates once a week, on Wednesdays. Also effective next week, Call Center hours will be reduced to half days. Calls to 707-441-5000 will be answered from 8 a.m. to noon, Monday through Friday. Calls received outside of those hours will be returned the following business day.

Vaccines remain readily available and, as always, Humboldt County's vaccination and testing services are available free of charge. While walk-ins are allowed at all Public Health clinics and some pharmacy vaccination sites, appointments are recommended for all vaccinations and are the best way to ensure a shot is available during your visit. Appointments can be made at [MyTurn.ca.gov](https://www.myturn.ca.gov).

Vaccines, including boosters, are available at local pharmacies. To check the availability of a specific vaccine, visit the [vaccines.gov](https://www.vaccines.gov) page, or text your ZIP code to 438829 to locate a nearby pharmacy offering vaccines.

See the schedule below for specific Public Health vaccination and testing clinic dates, times, locations and available services. Questions about clinic services can be directed to the Joint Information Center at 1-707-441-5000.
