- Assistance with medication refills
- Nursing case management.

Adult System of Care

Adult System of Care Roadmap to Wellness

If you have medical needs, you may be referred to a primary care provider to assist with managing your health.

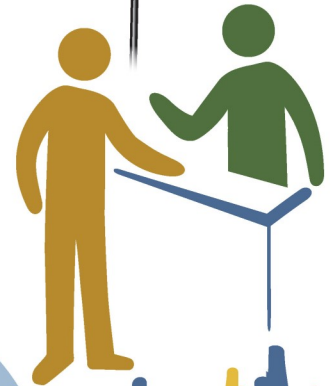

If at any time after receiving BH services you need additional support, you are welcome to contact us again.

You will receive services until you no longer need them or can continue with your primary care physician or other health care provider.

If your behavioral health service needs are mild, you may be referred to a provider in your community.

Depending on your needs, we will identify the best services for you.

We will assist you in connecting with a provider for services and with locating other supportive services including medical care, housing, social services, and insurance benefits if necessary.

Our staff will speak with you to determine what type of behavioral health services are most appropriate for you.
