## Section 4.5 Agricultural Resources

### Summary of Key Issues and Review of Alternatives

This Section covers land use issues as they relate to agricultural resources.

Section 4.5 Agricultural Resources				
Key Topics and Issues	Plan Update Approach (Alternative B)	Existing Framework Plan (Alternative D)	Alternative A	Alternative C
<p><b>Stable Land Base</b> The long-term sustainability of Humboldt’s agricultural economy hinges on the continued profitability of agricultural operations and the availability of farm land. Conversion of agriculture lands to other uses, such as rural residential and natural resources preservation, can negatively impact the agricultural industry as a whole.</p>	<p>Subdivision of agricultural land requires specific findings and residential subdivision of Agricultural Exclusive (AE) lands would not be allowed (AG-P5). Conversion of prime agricultural lands must include offsetting protections so there is no net loss (AG-P6). The Right-to-Farm Notice would continue to be used to protect producers from nuisance complaints from neighbors (AG-P8).</p>	<p>Does not contain policies that allow clustering of houses. Protects resource lands by advocating infill and establishing logical boundaries between urban and resource production areas using plan and zone designations. Includes an annual reporting requirement for the conversion of agricultural lands to other uses (2523.2 and 5-2520.1).</p>	<p>Includes a planned rural development program (AG-P1). Contains development timing policies to control conversion of agricultural land for urban expansion and prohibits conversion for other purposes (AG-P5). Includes explicit permitting compliance program (AG-Px). Explicit protection of prime soils (AG-Pxx). Generally, no further subdivisions on lands planned AE and AGR</p>	<p>Allows conversion of agricultural lands if found consistent with public interests (AG-G2) Does not include planned rural development and clustering program. Provides conversions of resource lands to residential outside of Community Planning Areas when agricultural production is not economically feasible (AG-P6). Second residential units would be allowed conditionally</p>

What blend of policies will provide the most protection for agricultural lands with the least impact on property values.			would be allowed (AG-P5, AG-S1).	regardless of density standards. Allows subdivision of agricultural lands for non-production purposes (AG-S3).
<p><b>Economic Viability of Ag Lands and Land Use Programs</b></p> <p>While agriculture is one of the most enduring industries in Humboldt county, operators are facing increasing challenges to maintain economically viable operations. The long-term sustainability of the agricultural land base and industry depends on continued commercial profitability.</p> <p>What measures can the County take to increase the long-term profitability of agricultural land management and production?</p>	Includes a planned rural development program that provides a density bonus when residential development is clustered and located on the least productive areas in exchange for permanent protection on the remainder. Can allow fractional sale of ranchland while maintaining overall productivity (AG-P1). Supports voluntary sale of residential development rights (AG-P2). Continues support for Williamson Act program (AG-P3). Supports supplemental farm income from activities compatible with agriculture (AG-P4).	Supports the Williamson Act Program (AG-P3 - 5-2520.3). Supports Predator Control program (AG-P9 - 2523.5) and vegetation management (AG-P11 - 2523.6) Promotes economic parcel sizes (AG-P13 - 2523.4 and 2523.9). Supported adoption of the “Right to Farm” ordinance. Supports public services for the agricultural industry (2523.11).	Similar to B. Explicitly adds research of a Transfer of Development Rights program and a carbon sequestration program into the County agricultural land conservation program (AG-IM2).	Fewer restrictions on agricultural conversion and subdivision can increase agricultural property values and sales (AG-G2, AG-P6, AG-S3). Support for Williamson Act Program (AG-P3) and supplemental farm income AG-P4.

	Supports continued agricultural production of lands under easement or purchased by a public agency (AG-P7). Includes a policy to seek advice from the farm community on planning projects near agricultural lands (Ag-P12). Includes program to brand and market local agricultural products (AG-IM7).
