Subject: Public Comment on the GPU

My comment refers to the new version of #7: scrap the new version and restore the original version.
Thank you! (I am a landowner in S. Humboldt County and registered voter.)

#7 Existing principle: "Protect natural resources, especially open space, water resources, water quality, scenic beauty, and salmonid habitat."

#7 New version: "Honor landowners' right to live in urban, suburban, rural or remote areas of the county while using a balanced approach to protect natural resources, especially open space, water resources, water quality and fisheries habitat in cooperation with state and federal agencies."
