Subject: Please change the Guiding Principles back to those of the March 2012 Section 1.4 version
Attachments: Letter to Supervisors re GPU Guiding Principles.pdf

Dear Supervisors and Planner Richardson,

Please read the attached letter and enter it into the Public Comments record.

Thank you,
Sheri Woo
McKinleyville, CA

Dear Humboldt County Supervisors,

A political trick is to repeat something over and over, so people will think it's the truth. One recent example with disastrous consequences was "Iraq has weapons of mass destruction so we must invade." Our Humboldt County version, playing out right now, is "The public supports the new General Plan Guiding Principles." Supervisors Estelle Fennel, Ryan Sundberg, Virginia Bass, and Rex Bohn, I think

saying you have public support doesn't make it so.

The key and most frequent words in your new Humboldt-Coalition-for-Property-Rights-inspired guiding principles text are public, support, and opportunities (see word cloud of Hum-CPR-inspired GPU Guiding Principles).

HumCPR-inspired GPU Guiding Principles

The key and most frequent words in the painstakingly crafted, 13-years-in-the-making March 2012 Guiding Principles are County, land, development (see word cloud of March 2012 GPU Section 1.4 Guiding Principles).

March 2012 GPU Section 1.4 Guiding Principles

The March 2012 Guiding Principles are honest; the County General Plan is largely about County land development. What is our vision for Humboldt County of the future? What are the values we hold that will allow us to make decisions on land use and development? We've had a 13-year-long public process hammering out the answers.

Please do not circumvent the planning process. Your vote to change the Guiding Principles was hasty; please change the Guiding Principles back to those of the March 2012 Section 1.4 version.
