

Please do not change the guiding principles.

Guiding principles are supposed to guide work as it progresses. Are you starting the whole process over? I have participated in the GPU process both as an individual and representing a public body, do we get the chance to engage again in light of these changes?

What happened to section 1500 and robust public participation? Did I miss the meetings in my neighborhood?

Speaking of public participation, what is with this ad hoc working group? Where is the public in that? Isn't the planning commission the place to figure things out and make recommendations?

Thank you, Michael McKaskle, Redway
