

CITIZENS' ADVISORY COMMITTEE ON MEASURE Z EXPENDITURES

(Advisory Committee will make recommendations to the Humboldt County Board of Supervisors as to expenditure of funds derived from *Measure Z*.)

APPLICATION FOR FUNDING

Agency Name: Humboldt Area Center for Harm Reduction (HACHR)

Mailing Address: Humboldt Area Center for Harm Reduction

P.O. Box 7365

Eureka, Ca 95502-7365

Contact Person: Raena West, LCSW

Title: HACHR Board Member

Telephone: 707-407-6013

E-mail address: hachr707@gmail.com

RECEIVED

FEB 17 2017

CAO

1. AMOUNT OF MEASURE Z FUNDING REQUESTED FOR FY 2017-18: \$ 3621.78

2. ENTITY TYPE -- Please check appropriate box.

- a. Humboldt County Department
- b. Contract Service Provider to Humboldt County
- c. Local Government Entity
- d. Private Service Provider
- e. Non-Profit Service Provider
- f. Other

3. Please provide brief description of proposal for which you are seeking funding.

HACHR is seeking funding for three outdoor Safe Disposal Bins to be placed in two Eureka locations (HACHR office and near 2nd street in Old Town) and one Arcata location.

4. *Measure Z* funding is scheduled to "sunset" in 2020. How are you developing a plan for sustainability, including diversification of funding sources, in order for your proposal to carry on without reliance on future *Measure Z* funds?

The funding request is for the initial cost of disposal bins only. HACHR will maintain the bins with grant funds, donations and volunteers. The material collected from the bins will be added to the biohazard disposal program HACHR is already providing.

5. If this request is for the continuation, or expansion, of an existing program/service, what is the current source of funding for that program/service?

Community partners, grants, private donors.

6. If you are awarded *Measure Z* funds, how will you use them to leverage additional grants, contributions, or community support?

The disposal bins are a way people can safely dispose of biohazardous material anytime. This will support the current exchange program and the community will know that even when HACHR or other agencies are not open, hazardous items can be safely disposed.

7. Will this proposal require new or expanded activity on the part of another entity to be fully functional and effective? If so, please describe.

ATTACHMENTS—Please include the following with your application

Proposal Narrative: Brief description of your request for *Measure Z* funds – Please explain how it is an essential service or for public safety. (one page maximum)

Prior Year Results: If your request is a continuation of a program funded with *Measure Z* in prior fiscal years, please provide the results of implementation. (one page maximum)

Program Budget

I declare under penalty of perjury under the laws of the State of California that the above statements and all attachments are true and correct

DATE: 2-17-17

Measure Z Proposal Narrative

There is a risk of needle sticks, cuts and punctures from needles and other sharp objects when they are not disposed of properly. Injuries from sharps waste can pose a large public health concern because it is possible for this waste to spread blood-borne pathogens by penetrating the skin. The spread of these pathogens is directly responsible for the transmission of blood-borne diseases, such as Hepatitis B (HBV), Hepatitis C (HCV), and HIV. Improper sharps management is a major factor involved in what is categorized as unsafe injections.

The general public can be at direct risk to injuries from sharps waste. If these hazardous materials are not separated from standard waste, individuals can unknowingly come in contact with them. In addition, if sharps waste is not disposed, and removed from the environment, then it can be subject to reuse and misuse. Waste collectors, those in law enforcement and first responders are at greatest risk. The spread of disease through sharps waste is preventable through proper management and disposal.

In order to protect the community and the environment, the safe and proper disposal of biohazardous sharps material is important to Humboldt County. HACHR is requesting support to provide the community with three fully secured safe disposal bins. HACHR will be responsible for collection, disposal fees and maintenance of the bins.

Thank you for considering this request.

Outdoor Pharmaceutical Disposal Kiosk, Square, 38 Gallons - CE138-CH-P

Pharmaceutical Collection Kiosk, 38 Gal Capacity, Dual Lock Cabinet Includes Approved Medical Waste Liner, With Sight Glass

Securr Pharmaceutical Collection Kiosks are heavy duty, products that are a great choice where aesthetics and durability are key. Using a "chute" type loading door, contents are secure and can not be removed unless the service door is unlocked. Can be used as for sharps disposal (CE138-CH-S) or pharmaceutical disposal (CE138-CH-P). The Pharm kiosk has two locks on the unloading door and the sharps kiosk has one. Can be used outdoors in the harshest of environments.

Made from corrosion resistant galvanized steel, these attractive, sturdy containers will secure your contents while offering years of trouble free service. Galvanized steel is a cold rolled steel with a Galvanized coating. This material has the same corrosion inhibiting properties as hot-dipped galvanized but has the advantage of excellent adherence of powder coated finishes. The loading chute is lined with stainless steel. Inside the heavy-gauge steel enclosure is a regulated medical waste liner with lid that can be removed and transported. The liner has 38 gallons of capacity.
