Humboldt County General Plan

Update initiated Year 2000 ➔ Adopted October, 2017

Changes from prior General Plan that will prompt Zoning amendments:

- **New Elements**: Water Resources, consolidated Conservation and Open Space.

- **New Land Use Designations**: Mixed Use, Village Center, Residential Estates, Residential Agriculture, and new open space and public land designations

- **New allowable uses**, such as single family and second residences in Ag and Timber lands

- **Expanded protections for resources**, such as larger streamside management area buffers, limitations on agricultural land conversion, and water supply evaluation and monitoring

- **Precise Land Use Mapping** throughout the County
Work Program 2018-2019

Based on a public request for the county to slow down the process, the Board defined a four step work plan for Planning staff:

The four steps include:

Zoning Map Amendments

What are we doing and Why are we Doing it?

• Apply Zones to land zoned as “U – Unclassified”
• Re-Zone land:
  • Where the General Plan Land Use was changed and the existing Zone is inconsistent
  • Where there was already an inconsistency between the General Plan & Zone
  • To consistently apply zones throughout the county

apply the “RA - Rural Residential Agriculture Zone” to land planned for suburban and rural residential uses within Community Planning Areas
Zoning Map Amendments

- Considerations used in applying Zones and minimum lot sizes
  - Within or outside Community Planning Areas
  - Availability of services (located within a district that provides water or sewer & water)
  - Compatibility with surrounding Zoning Districts
  - Road access (proximity to a public road, located on a dead end road, remoteness)
  - The average size of parcels within the Zoning District
General Plan Land Use

---

This image depicts a General Plan Land Use map for a specific area. The map is color-coded with various land use designations, such as Residential (R), Commercial (C), and Industrial (I). The map includes labeled areas such as "Hydesville - Carlotta" and "Rio Dell - Scotia." The map provides a visual representation of the land use distribution within the planning district.
