Subject: Wind Farm

I urge you to scrap even the further thought of this project. As a past resident of Humboldt Co. I can relate to the areas beauty and cultural relationship with the Eel River valley. As a current resident of Shasta Co. I can relay first hand the degradation that has occurred from a similar project installed on Bunchgrass ridge near Burney. The huge windmills are visible from Redding and have destroyed the natural beauty of the area while greatly curtailing access the the forest for recreational use.
