Subject: I oppose Terra- Gen wind turbines

I understand that Terra-Gen, wants to install 600- foot tall wind turbines on Monument and Bear River Ridge. Although I am an advocate of renewable energy sources such as wind power, I don't like this project. The huge towers could be seen for miles, and would spoil the natural beauty of this pristine wilderness area. Also, the huge concrete pads that the towers sit on would have a permanent detrimental impact on this delicate ecosystem.

I20-1

Thank you for your consideration.
