Subject: Proposed wind farm

Dear Sirs

I am a Humboldt County resident and landowner and have listened to and considered the impacts and pros and cons of the wind farm being proposed for our county.

I'm appalled by the corporate lack of honesty and the so called scientific slight of hand being employed in order to gain public approval for this gigantic business plan.

This proposed wind farm will forever alter the landscape of our county, destroy irreplaceable and invaluable natural systems, wildlife and the "quite enjoyment" of property owners and residents. When one honestly weighs the benefits against the environmental, cultural and community costs, it clearly only serves to make money for the non country owners while irrevocably damaging everyone and everything else.

I'm a tax payer and I vote. I have children and grandchildren. Please be advised that any board of supervisors members or other elected or appointed officials of Humboldt county that supports this proposed project shall be vigorously opposed by me and my family, financially and through the democratic elections process.

We all support sustainable energy and recognize the dire climate situation. However, this proposed monstrous wind farm installed in our fragile country against the will of the citizens is a ridiculous attempt at a sustainable solution and will be vigorously opposed.

Please so note and act in sane accordance with the will of the people of our county.

Sincerely,

Charles N. Gould
Petrolia, California
