**Subject:** Please say no to the Wind Farm project...

Don't be misled by the PR surrounding the proposed massive wind farm project. Rather than supporting a Trump-like scheme to benefit the bottom line of a corporation at the expense of the environment and our way-of-life, only provide a few jobs, that will likely be filled by employees brought in, encourage solar power projects that would provide many good jobs installing solar equipment that would provide immediate returns.

The many negative long-term impacts by the wind farm to our environment would be devastating, and require constant a maintenance burden...again at our expense. Another significant on-going corporate benefit would be the tax credits which the public would not benefit from.
