**Subject:** Proposed Monument Ridge Wind Project

To Whom It May Concern,  
I live in Humboldt County and am opposed to this project as it is being proposed. ALL possible measures need to be discussed that would mitigate deaths to bats, birds, mammals, insects, etc before this project is considered for approval. This area is a significant bird migration route and habitat. Please take care of our environment by listening to those of us who speak for the creatures that cannot speak for themselves.
