Subject: Wind turbine project

I'd just like to say that most people I know support this project, but there's people posting opinion pieces and such with some really blatant misinformation and with encouraging people to write to you. My favorite total bullshit claim so far is that the trees+grass cut during construction would have absorbed more CO2 than the project will prevent over its lifetime.... Seriously. someone said that. published on lostcoastoutpost, which is just sad.

I46-1

Let's have some renewable energy!
