Subject: Terra Gen

Dear CEQA

I am writing to give my 100% support to the Terra Gen wind project.

Climate disruption is coming faster and faster. We need to install this project now, without delay and with maximum size possible if we have any hope of a planet to live on. I don't want to have the youth of tomorrow ask us why we didn't do anything to keep the earth safe.

Most of the arguments against are between blatenly false, misleading or taken out of context. And all of the arguments have one thing in common. They ignore the impact of where we get our energy from now. We get our gas from fracking, but not here. We don't see the damage, or visual impact, or damaged environment, or smell, or methane or damaged aquifers or trucks on their roads etc. We don't see the 1000's of miles of pipelines and power lines bringing us our energy. Have you ever seen a fracking zone, what a disaster. Have you heard anyone of the no crowd mention where we get our energy? Talking about those corridors without trees, etc? Nope. This is NIMBYism at its worst.

People are upset that they will now have a visual impact, and an environmental impact as to THEIR energy consumption. To these folks its out of sight, out of mind. You or I won't be able to fix or reason with the no folks as to why this project is not just a good idea, its a great idea and needed now. But you can't have that outspoken few destroy it for the many. And when I mean the many I am talking about Humboldt county, and the planet: plants, animals, humans everything.

And in no small part, this is a great way to bring jobs into the area. It'll bring much needed tax revenue and it will bring a lot of money during construction. It will also bring a philosophy of HumCo is ready for green business. To have this project denied or even delayed will continue the impression that HumCo isn't open to business.

I have been working in the PV, renewable energy industry for 25 years. This is needed now.

Please approve this project with expedited speed, no delays.

Sincerely,

Jay Peltz
