Subject: Wind Turbines in Humboldt

Dear Supervisors,

I am appealing to your caution and attention to details as you move to hear about and approve, or disapprove, Wind Turbines in Humboldt County, specifically the Terra Gen project proposed for Bear River and Monument Ridge.

There has been quite a lively debate going on in the Mattole Valley, as various views have been expressed and endless links to information on all sides has been offered. I have read and listened to as much as I could.

I truly want to believe that Wind Energy is part of the answer to our concerns about energy needs and environmental concerns. But from all I have learned, it appears that the industry is charging forward without proper research and without proper concern for people, land, and animals, and the future.

Do we ever learn from the past? Rushing ahead and not listening to the Native American tribes input? That's just wrong.

I have serious concerns about Fire danger in this volatile time. I have concerns about nearby neighbor's health and private property. I have concerns about the company being responsible to clean up their waste and take care of the roads long range. The birds, condors, eagles, etc. that this will kill is just wrong.

We already have a nightmare of road hazards here in Humboldt. And I see our roads digressing from the Industrial Pot's footprint on our community already.

I do not appreciate industry that does not care about the community they live in. They give lip service, but it does not bear up truthful.

Please please reject this project, and others like it, until there is really honest research to PROVE people and animals will be safe, and the environment will not be trashed. Please don't be fooled by fast talking sales techniques, no matter how polished. Focus on facts. And respect the neighbors and tribes input.

Thank you kindly for serving our community.

Roxy Kennedy
