Humboldt Wind Project Planner

County of Humboldt, Planning and Building Department

3015 H St., Eureka, CA 95501

CEQAResponses@co.humboldt.ca.us.

We are a family who ranch grass-fed beef cattle and also lead a summer camp program for 175 children each year, Lost Coast Camp, here in the Mattole Valley. We try to live a “green as possible” life, paying close attention to where our food comes from, how much electricity we use, and what we can do to reuse and recycle waste. We try to maximize as much “green” living as possible.

We had not given much consideration to wind farm energy production until recently. We’d seen these turbines while driving on the lower Sacramento River and up the Columbia River Gorge and elsewhere, noting their size, but never got very close. They seemed okay but we were also glad to not have them in our back yard.

We went to the information meeting by Terra Gen a few weeks ago at the Mattole Valley Community Center, and since then have been educating ourselves about mega industrial wind farms. Many thousands of people in the U.S., Canada and Europe, forced to live in proximity to these machines have gone on record about the serious health risks caused by them. There is an extensive documentary film record of these dangers, and of how local populations opposition has been ignored by politicians and mega- corporations profiting from their construction. We therefore demand a stop to this Terra Gen plan now.

our Humboldt County first must pass a comprehensive **Wind Ordinance** which addresses

Property Value Guarantees, Turbine Setbacks, Noise Standards, Environmental Protections, and, so important,

I107-1

Decommissioning Plans.
