Humboldt Wind Energy Project Planner

County of Humboldt Planning Department

3015 H Street
Eureka, CA 95501

To whom this may concern,

There is nothing beneficial to anyone in Terra-Gen's proposed wind farm in Humboldt County, except maybe to line their pockets at the expense of our treasured open spaces & a quality of life that county residents are ready to fight for.

Maybe this company believed that the people in our sparsely populated county wouldn't even notice such a proposal, but I think they are rapidly finding out that this is not the case. Over-sized projects on the scale they have proposed have no place here or anywhere for that matter. In the disguise of "clean energy" there will be destruction every inch of the way, if they are allowed to go forward with their plan: from logging, to road building, wildlife kills, potential fuel contamination & overuse of fossil fuel to run their "clean energy". Our area is perfect for small-scale clean energy plans, such as solar for every household. But this plan is absolutely UNACCEPTABLE.

163-1

Please do not approve this proposal. This company looks for profits & energy to send far away from our community. What will they do when the turbines are no longer viable? The turbines are enormous & require huge amounts of resources to build. Then what happens as they reach the end of their life span? No. This is absolutely UNACCEPTABLE. I OPPOSE THIS PROJECT COMPLETELY.

Sincerely yours,

Lynn McCulloch
