Re: Humboldt Wind Energy Project

I have been a Humboldt County resident for more than 25 years. My profession as a building designer makes me acutely aware of the carbon impact of our energy use. The environmental, economic and societal effects of a business as usual scenario are catastrophic. It is imperative that we reduce our use of carbon based fuels and increase our use of renewable energy sources as quickly as possible.

The current proposal for the Humboldt Wind Energy Project is an excellent example of what should be built now. I highly recommend that the Humboldt County Board of Supervisors votes to approve the Humboldt Wind Energy Project.

I
