Subject: Comment on Terra-Gen Wind Turbine project

I'd like to submit a comment on the Terra-Gen project. While I agree that wind energy is crucial, I am highly concerned that the project would be detrimental to the Wiyot Tribe ancestral resources. According to the DEIR, "Constructing WTGs on Bear River Ridge would be a significant visual impact on this sacred high place. No feasible mitigation is available to reduce this significant impact; therefore, this impact would be significant and unavoidable."

184-1

For this reason, the project is a poor fit for the community and should not be approved as proposed. A project should be developed that the Wiyot Tribe agrees to or in a different location.

All the best,

Allison Edrington
