Subject: Wind Energy Project

I totally support this Wind Energy Project as it represents exactly what we need to do so that we can reach 100% renewable energy by 2030. We have already wasted 30 years so we need forge forward quickly now so that we can stop the worst consequences of climate change. The IPCC has told us we only have a decade left to start this extremely critical work. Wind Energy has not been seen the way solar has in Humboldt County. It is high time that Humboldt County starts with Wind Energy NOW!
