No where in the report do I see mention of the Aleutian Geese who migrate each year to Table Bluff which is a plateau just south of Fields Landing. These are those special geese who fly in V like patterns. Has any EPA study done to see how the habits of these birds and any other wild life will be effected by a change in activity to the harbor?

The report says no changes are expected to the existing Fields Landing Harbor. Has anyone looked at it? If you had you'd see this is set up as a recreational parking facility with a narrow boat ramp. The usage of the harbor is greatly dependent on the position of the tides.

This is a main source of fishing for crab fisherman. Have they given input?

I oppose this project .The very idea that Fields Landing is an appropriate access point is ludicrous.

It is an invasion of my neighborhood and a misuse of the facilities of our Harbor. This is the Jimmy Smith Neighborhood park project in on going stages. Has anyone checked on this restriction to our land use?

Tell me honestly. Many of us,most of us, don't want this. exactly what is the procedure for preventing it? do we need court intervention?

thank You
