**Date:** Sunday, June 09, 2019 2:05:29 PM

---

I am in support of this project even though the mitigations in the EIR seem inadequate: we are at a time in history where we have wasted 30 years and we are one minute before midnight. The time to act is now and we must at least try to meet the need of 100% sustainable energy by 2030.

I  
112-1

Sincerely

Joanna Welch  
Eureka CA
