Wind Energy Project Planner  
County of Humboldt Planning Department  
3015 H Street  
Eureka, CA 95501

Dear Planning Department,

Please do not approve this project. This project for many reasons will have a very negative impact on our community.

First and foremost is the Extremely High fire danger created by power lines/transmission lines carrying electricity. The last 2 catastrophic fires California has had were started by PG&E power lines. This project would require new lines from the ridge to Bridgeville. Creating a whole new corridor of fire danger. This project should be rejected on this issue alone.

Other issues that are reasons for denying the project are:

- Large use of water that could have a negative impact on the local community of Scotia
- Impacts of construction on the roads
- Impacts from construction on the landscape
- Use of enormous amounts of concrete
- Impacts of vibrations from the windmills on human and wildlife populations

This project has not been studied enough and should not be on Fast Track. There are too many problems and potential disasters with it as it stands now.

Please reject it.

Thank you,  
Robie Tenorio  
Gilbert Gregori
