Subject: Terra Gen Windmill Industrial Farm in Humboldt County

I AM OPPOSED to the windmill project proposed by Terra Gen on Monument & Bear River Ridges.

This project has been a conundrum for me because I am an environmentalist and I believe that climate change is the most serious issue of our time that must be dealt with immediately.

However, even though developing renewable energy projects is the right thing to do, I do not believe that this project is the right way to do it.

The unintended risks greatly outweigh the benefits. The destruction to the land in the construction phase & all of the resources to build these giant structures, death of birds, bats & other wildlife after the windmills are in use are not worth the .3 percent amount of power produced for California. Let the environment alone & let nature do its own thing by having the grasses & trees absorb the co2 from the air.

This area is a unique place in all of the Pacific Coast & should be allowed to not be destroyed in this endeavor. This is not a renewable project. The landscape would be forever altered. And the greatest irony is that apparently lots of oil would be required to operate it.

These giant industrial windmills do not belong on the Lost Coast area. Or maybe they are not the answer anywhere.

Sincerely,
Sandra Antonson
