Subject: Humboldt Wind Project

Dear Mr.Ford,

My name is Maureen Catalina and I own property in Honeydew, Ferndale, and Petrolia. I am completely and unequivocally opposed to the industrial wind project from Terra Gen. The DEIR report is incomplete and has many flaws. I'm sure you have received numerous letters pointing out the multiple problems. But for the record I will state some of flaws I am aware of here. The "piece meal" tactics of the Humboldt Wind Project make it very hard to understand exactly what the impact will be. I am hoping that you realize that for every one person that writes to you there are hundreds of others that are uninformed or just don't take the action required to contact you. Everyone I have spoken to or written to is against this project. This project has so many flaws that it would take a five page letter to point them all out to you. Please protect the welfare of the good citizens of Humboldt County by opposing this project. The DEIR report is:

I173-1

1. Incomplete. It has many flaws such as fire services financing plan does not exist, fall rescue plan does not exist, plant management does not exist, fire danger Analysis does not exist.

2. The wildlife studies are incomplete. They referred to the condor as an "experimental species". Are they just trying to avoid protecting this amazing animal? Terra Gen stated in their presentations that they really can't predict what the new weather patterns will be, and therefore don't know how their project will affect our area! They don't know if the new weather patterns will affect the migratory patterns of birds. I agree, they cannot predict anything therefore we need to sit back and let nature readjust before we move in to make huge changes such as building wind turbines to kill our amazing bird population, or dry weather sparks a fire that is exacerbated by the wind turbines.

I173-2

3. We have not discussed any alternative choices for energy in our area. The technological advances are mind

I173-3

blowing. Energy gathering tools are changing faster than anyone seems to realize. We do not need huge wind turbines destroying our wild areas and our real estate value. Humboldt has nothing to gain with huge industrial turbines owned by big oil corporations that sell the energy on the open market.

1173-3
(Cont.)

Please step up and protect all of us by opposing this project. Thank you so much for reading my letter I sincerely appreciate it.

Sincerely and Respectfully Yours, a true Humboldt County fan and taxpayer, Maureen Catalina
