Subject: Terre Gen Wind project

I am not in favor of any wind energy project in the proposed area. This area has been exploited and abused for over a century. There are continuous efforts to restore the environment and having a project like this adding additional damage is heartbreaking.
Natalynne DeLapp posted "There is no energy source that can be implemented on a large scale completely free of any environmental impact. " But if this project is not implemented it would guarantee the area would be completely free of any environmental impacts. There are plenty of other locations that would have much less environmental impact. I don't care about surveys, science, experts, etc. My position is purely emotional. I'm in the "not in my backyard" camp, actually "not in anyone's backyard".
I would rather pay higher taxes and higher utility rates than see this project approved because it would bring revenue to the county.
