Subject: Public comment on Terra-Gen wind energy project

Humboldt Wind Energy Project Planner
 County of Humboldt Planning Department
 3015 H St.
 Eureka, Ca. 95501

To whom it concerns,
 My letter is in regards to the Draft Environmental Impact Report (DEIR) for the Terra-Gen wind energy project.

Since the County of Humboldt is acting as the lead agency with the project, my recommendation is to request the Schatz Energy Research Center at HSU to be involved in the project study. The Schatz Energy Research Center gave results in 2012 of a two year renewable energy planning study through the California Energy Commission's Renewable Energy Secure Communities (RESCO) program. One thing that stood out in their conclusions is that wind energy is the most cost effective of the renewable energy

generation technologies.

We know that because climate change is a fact, that we need to reduce the use of oil and gas for our energy needs. The environmental and landscape concerns that I have seen in public comment recently are nothing compared to the drastic long term changes to the environment and landscape if we do not make changes toward green energy now.
