Subject: Against: Terra-Gen Humboldt Wind Energy Project

The Terra-Gen Humboldt Wind Energy Project should not be allowed. This project would result in significant, adverse impacts to the environment including: aesthetics and visual resources, air quality; biological resources; hazards and hazardous materials; hydrology and water quality, noise and vibration; and transportation and circulation, tribal cultural resources and wildfire. None of these significant adverse impacts can be fully mitigated. No energy technology that has significant adverse environmental impacts should be allowed.

I215-1

Sincerely,

Gail Popham, Retired Biologist
