Subject: Terra Gen Proposal for wind farm on Monument and Bear Ridges

Dear Honorable Sirs and Madames:

Please do not allow this misguided proposal to move forward. I am attaching photos of a windmill visible from Highway 5 near the junction of Highway 152...as well as some transmission lines. I think you can see how enormous they are. Those of the terrible Terra Gen proposal would be of similar proportions.

Please pursue decentralized energy production for Humboldt County, such as solar panels on every home so no need of transmission lines and no industrialization of our beloved land and sky.

We are at a juncture in which every decision we make in regards the use of our dwindling precious land and air resources will have significant consequences for a very long time. We do not need this project. Terra Gen and it's parent company Stantec need this proposal. Are the residents of Humboldt County to be held hostage to yet another large corporation who will bestow upon us a measley benefit, but leave us with environmental degradation for years to come?

Please consider the benefit of any development in terms of its' service to our critically impaired biological systems. Humboldt has been lucky not to have the growing human population putting extreme pressure upon our land and air and water...we have an opportunity to design responsible developments that meet human needs as well as those needs of all living creatures in our rare biosphere.

I214-1

Please do not allow this proposal to go any further in the planning stages...it is too massive and does not serve the wider interests of Humboldt County residents, human and otherwise.

Please see the windmill and transmission lines we would be subject to if this proposal obtains your approval.

Thank you for your consideration.
