Subject: Opposing the Terra-Gen wind turbine farm
Date: Thursday, June 06, 2019 10:03:20 PM

Hi county planning folks,

I'm writing to voice my opposition to the proposed wind farm that Terra-Gen would like to build on Bear and Monument Ridges. Not only is this opposed by the Wiyot people whose ancestral homeland this is--which should be reason enough to stop it--but it does not serve the long-term goals of sustainability and conservation for our children and future generations. Wind turbine farms have significant environmental impacts; we need a broader view of what is sustainable, and above all need to engage in education and action aimed at reducing energy use rather than simply "greening" it so we can keep consuming all we want.

Please do not give your stamp of approval to this project.

Sincerely,
Maggie McKnight
