Subject: TerraGen Humboldt Wind Energy Project

Please include the attached document into the record for the Humboldt Wind LLC proposed wind turbine development project. The document is relevant to the issue of "take" under the Federal Endangered Species Act.

TerraGen, Humboldt Redwood Company, Russ Ranch, and Humboldt County do not possess an incidental take permit, nor has any one of those entities applied for such a permit.

Because an ITP process will require and provide significant new information on the proposed project, recirculating the draft EIR will be required as a matter of law.
