Subject: DEIR Comments on the Humboldt Wind Project

Hi Beth,

Attached are the Tribe’s comments on the Humboldt Wind Project DEIR. At the end of the document there is a photo of *Fritillaria affinis*, a culturally important plant in the Bear River Ridge Prairie, along with the plant list and a rough copy of our older species list that includes the condor, bald eagle, northern harrier, and other TCR species, which I don’t think I had provided before. Separately attached above is a view of Table Bluff from **Tsakiyuwit**. Let me know if you have any problems with the document, questions, or clarifications. I will be out of town next week until 6/25. Thanks for your time and consideration and Happy Friday! Adam
