Positivity Rate*

Tier Definitions**

| Community Risk | Individual Risk | Adjusted Case Rate | Positivity Rate |
|------------------------------|---|---|---------------------------------------|
| Widespread Tier 1 | Widespread outbreak that is growing with many undetected cases. Take strong measures to limit all contact. | More than 7 daily new cases (per 100k) | More than 8% positive tests |
| Substantial Tier 2 | Many cases with conditions for community spread, with many undetected cases likely. Limit everyday activities to increase safety. | 4 - 7 daily new cases (per 100k) | 5 - 8% positive tests |
| Moderate Tier 3 | Moderate number of cases with majority of cases from a known source. Increase efforts to limit personal exposure. | 1 - 3.9 daily new cases (per 100k) | 2 - 4.9% positive tests |
| Minimal Tier 4 | Cases are somewhat sporadic, and contact tracing can be used to control the virus. Take everyday enhanced precautions. | Less than 1 daily new cases (per 100k) | Less than 2% positive tests |

Follow [local](#) and [state](#) health orders and guidance.

*Data used by the state to determine tier assignment. Local and state numbers rarely align because local data is updated daily, whereas the state's data is calculated over a seven-day period with a seven-day lag and is updated each Tuesday.

**The state's "Blueprint for a Safer Economy" includes a Health Equity Metric, which requires having similar positivity rates across a county to demonstrate that no community is disproportionately impacted by COVID-19. Meeting this metric is necessary before movement into a less restrictive tier, and in some instances may allow earlier movement. Read more about the [Health Equity Metric](#).
